(*1) NOTE - 2 Types of Bendix power brake units were used in 1957 production. These 2 types are not identifiable from the outside. The 1st type unit used only in early production is of the vacuum reaction type. The 2nd type unit is of the hydraulic reaction type. The 2nd type unit may be identified when disassembled by the reaction rod, located inside of the hydraulic plunger. The 1st type unit does not have this rod.
