**EXCITING NEW EXPERIENCES
IN COLOR WITH . . .
MERCURY/MERCURY COMET'S
SUPER ENAMEL FINISHES**

Mercury and Mercury Comet's exterior selections for 1966 satisfy even the most discriminate taste. The high-lustre, mirror-like 3-coat acrylic enamels are baked-on to form a protective cover over the body sheet metal.

These Super Enamel Finishes have quality features which are outstanding in the automotive industry—gloss retention—extreme resistance to dulling, chalking, and chipping—and extra years of beauty and protection.

The two-tone color combinations available on both Mercury and Mercury Comet models are optional.
