

RUNNING THE CD

The Pontiac GTO Product Information CD is self-starting. For computer systems with the minimum recommended requirements, the CD-ROM will execute automatically. All programs should be closed prior to launching. After inserting the CD-ROM in the CD drive, the application should run automatically. If not, follow these procedures:

WINDOWS 9X/ME AND NT/2000

From the desktop, open "My Computer"
Double-click CD drive

MACINTOSH POWER PC

Double-click the CD icon on your desktop

WORKING WITH TEXT FILES

Text materials contained on the CD-ROM are RTF files. You may view, scroll and copy text directly from the Product Information screen or save the text in RTF format. Click on the "Text" button, and your system will prompt you to enter a saving location.

You may also copy text files directly from the CD-ROM. They are located in the folder labeled "DOC."

WORKING WITH PHOTOGRAPHY

The photo images on this CD can be downloaded in both high- and low-resolution formats. The high-resolution images are RGB JPEG file formats, which are approximately 30MB in size when uncompressed.

Click on a thumbnail image to view a larger image. Select your desired resolution. Your system will prompt you to enter a saving location for the image file.

You may also copy image files directly from the CD-ROM. The high-resolution images are located in the "HI_RES" folder and the low-resolution images (FPOs) are located in the "LO_RES" folder.

SYSTEM REQUIREMENTS

WINDOWS 9X/ME AND NT/2000

- 486+ Processor (Pentium recommended)
- 16MB RAM (32MB recommended)
- CD-ROM drive
- High-Color Display (16 bit minimum)
- Sound Card recommended

MACINTOSH POWER PC

- System 8.0 or higher
- 16MB RAM (32MB recommended)
- CD-ROM drive
- Thousands of colors display (16 bit minimum)

Note: Your CD setting should have your Auto Insert Notification activated for the CD-ROM to launch automatically. If not, follow these steps:

- Go to the "Start" menu
- Select "Settings," then select "Control Panel"
- Double-click the "System" icon
- Go to "Device Manager" tab
- Double-click "CD-ROM," then double-click "Driver Inside"
- Click the "Settings" tab
- Check "Auto Insert Notification"
- Select "OK" Restart computer
